

TradingView and Community Analysis

Data through 27 August 2026

1. What users like and dislike about TradingView features

Feature area	Positive mentions	Negative mentions	Discussions	Engagement	Product reading
Option-chain analytics	5043	2235	9620	69396	Users value decision-ready derivatives context, not just raw quotes.
Execution and order workflow	4483	2010	8731	63344	Chart-to-order speed and control are central to perceived quality.
Indicators	4125	1994	7763	58017	Breadth matters, but setup clarity and responsiveness matter more.
Risk and payoff	3597	1397	6628	48539	Pre-trade risk visibility is a recurring adoption lever.
Charts and charting	3152	1641	6044	44013	Chart reliability and customisation are foundational expectations.
Community and ideas	2546	1248	4356	34169	Discovery and education can turn analysis into repeat usage.
Alerts and automation	1097	881	2026	15057	Users want dependable, actionable notifications.
Performance and reliability	1053	1219	1437	14638	Reliability issues can outweigh feature breadth.
Watchlists and screeners	146	57	207	2295	Reusable discovery workflows reduce daily effort.
Backtesting and replay	50	26	67	1068	Users need evidence before trusting a strategy.

Positive/negative counts are based on feature-related wording in the collected text, not Like buttons.

2. Groww Chart, Sahi Chart and Dhan Chart discussions

These are keyword matches across the corpus, not verified unique people. A YouTube title or broker page is product evidence, not community sentiment.

Chart/topic	Corpus matches	Source mix	What can be concluded
Groww Chart	4	youtube: 2, manual_web_research: 2	Needs community-specific collection before claiming user preference.
Sahi Chart	0	No matching source	No matching record in the current snapshots.
Dhan Chart	46	community_forum: 24, youtube: 21, manual_web_research: 1	Needs community-specific collection before claiming user preference.
Sahi 5-second Chart	0	No matching source	No matching record in the current snapshots.

3. Indicator mentions ranked by frequency

Rank	Indicator	Mentions
1	EMA	5946
2	SMA	1807
3	RSI	1712
4	Fibonacci	706
5	MACD	411
6	VWAP	219
7	Bollinger Bands	205
8	ATR	91
9	Ichimoku	87
10	ADX	68
11	Supertrend	45
12	Stochastic	33

4. What users are asking for on TradingView

Rank	Request category	Discussions	Engagement	Product opportunity
1	Option-chain analytics	9620	69396	Users value decision-ready derivatives context, not just raw quotes.
2	Execution and order workflow	8731	63344	Chart-to-order speed and control are central to perceived quality.
3	Indicators	7763	58017	Breadth matters, but setup clarity and responsiveness matter more.
4	Risk and payoff	6628	48539	Pre-trade risk visibility is a recurring adoption lever.

Rank	Request category	Discussions	Engagement	Product opportunity
5	Charts and charting	6044	44013	Chart reliability and customisation are foundational expectations.
6	Community and ideas	4356	34169	Discovery and education can turn analysis into repeat usage.
7	Alerts and automation	2026	15057	Users want dependable, actionable notifications.
8	Performance and reliability	1437	14638	Reliability issues can outweigh feature breadth.
9	Watchlists and screeners	207	2295	Reusable discovery workflows reduce daily effort.
10	Backtesting and replay	67	1068	Users need evidence before trusting a strategy.

6. Discussions about TradingView and broker charts

Topic	Matching discussions	Unique authors
TradingView	1272	1276
Groww Chart	4	Not available
Sahi Chart	0	Not available
Dhan Chart	46	Not available

Author counts use the anonymized author hash when the source exposes it; they are not inferred from thread counts.

7. Product opportunity ranking

Themes are grouped once across the full corpus. Engagement is a prioritisation signal, not a user count.

Rank	Product theme	Records	Engagement	Comments	Avg. length	Product implication
1	Option-chain analytics	9620	69396	6520	272	Expose actionable chain filters, OI/IV context and saved views.
2	Execution and order workflow	8731	63344	6215	273	Reduce chart-to-order friction and make order status explicit.
3	Indicators	7763	58017	4562	296	Prioritise fast indicator setup, presets and clear explanations.
4	Risk and payoff	6628	48539	4213	279	Make payoff, SL/TP and risk-reward visible before order placement.
5	Charts and charting	6044	44013	3845	300	Invest in speed, layouts, drawings and consistent price display.
6	Community and ideas	4356	34169	2533	326	Improve discovery, publishing, follow and idea-to-trade workflows.
7	Alerts and automation	2026	15057	1128	383	Support dependable alerts, webhooks and reusable conditions.
8	Performance and reliability	1437	14638	1163	389	Instrument load time, errors and disconnects and surface status.
9	Watchlists and screeners	207	2295	176	292	Add reusable filters, saved screens and fast watchlist actions.
10	Backtesting and replay	67	1068	51	371	Connect replay/backtesting to rules, metrics and paper execution.

8. Sahi 5-second chart discussions

Matching records: **0**. Sahi publicly describes a 5-second chart in Scalper Mode, but the current TradingView-community corpus contains no matching user discussion.

9. Loading and performance issues

Matching records: **1453**. This is a broad keyword signal across sources and is not a platform-specific incident count.

10. Source validation

TradingView does have a native options-chain product today, including calls-only, puts-only and straddle views, expiry/strike/spread filters, bid/ask, Greeks and implied volatility. Option-chain mentions in this report describe discussion themes; they do not mean TradingView lacks an option chain.

Groww, Dhan and Sahi chart claims are product evidence from official pages. They are separate from community sentiment counts.
